

LS COMMERCIAL REAL ESTATE
BROKERAGE ♦ DEVELOPMENT ♦ MANAGEMENT

January 18, 2012

The Honorable Julius Genachowski
Chairman, Federal Communications Commission
445 12th Street, SW
Room 8-B201
Washington, DC 20554

Dear Chairman Genachowski:

I want to register my support for a new wireless network being proposed by LightSquared. LightSquared's new 4G wireless network would be extremely beneficial to businesses and consumers throughout the states of Missouri and Kansas.

My company, located in Overland Park, Kansas, represents a large portfolio of commercial property located in the Midwest.

As a business owner, I understand the need to plan for the future and I am concerned that our country is ill prepared to meet the growing demand for wireless spectrum. Smartphones, which are becoming more and more commonplace, use 24 times more spectrum than regular cell phones and iPads use 120 times more spectrum. Businesses cannot compete if we do not have a robust telecommunications infrastructure in place and adequate spectrum to accommodate those devices.

LightSquared is prepared to invest \$14 billion in this new network which will create thousands of jobs. Unfortunately, it appears that there is some question surrounding the integrity of recent testing of the new network.

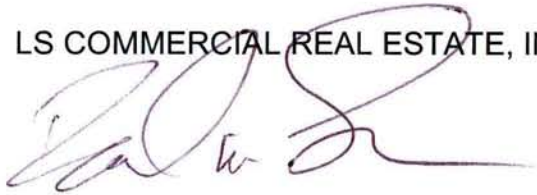

I want to encourage the FCC to actively engage all of the key stakeholders and conduct open and transparent testing to truly identify weaknesses that then can be addressed with engineering solutions. This appears to be the only way forward to ensure the new network is compatible with existing technologies.

I am confident the FCC can conduct a thorough testing process and facilitate the deployment of this much-needed network without causing widespread and harmful interference.

Thank you for your oversight in this critical issue.

Sincerely,

LS COMMERCIAL REAL ESTATE, INC.
